JustGivit
A digital platform for giving

Student: Sam Jian Shen   Supervisor: Dr Own Noel Newton Fernando
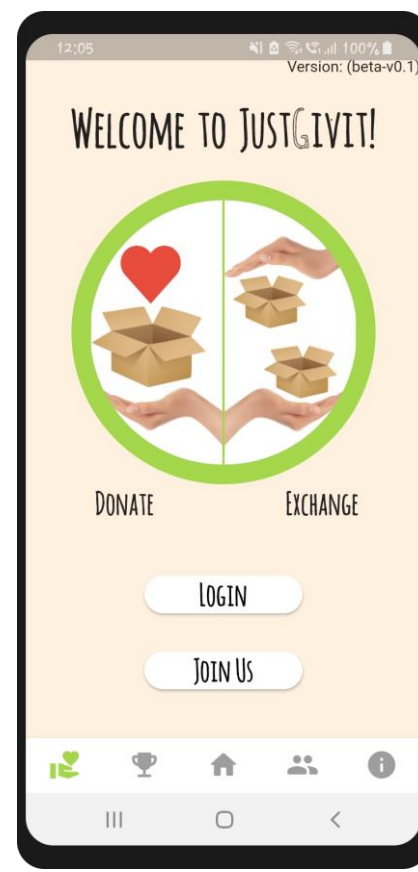

About

A software that helps to indirectly reduce waste production in Singapore, through **donate** or **exchange** reusable and unwanted goods!
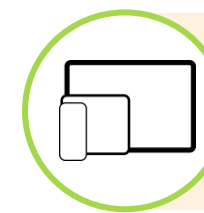

Objectives

1. Build a donation system
**2**. Build an exchange system

**"One man's trash is another man's treasure"**

Software Features
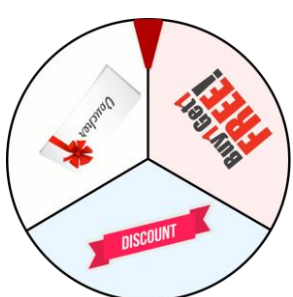

- **Support Multi-Platform**
- **Single-Code Based**
- **Business Logic Components**

Application Features

Donors

- Item needs available in Singapore
- Capture Image
- Donated item's status tracker
- Reward Incentives

Exchanger

- Setup Preferences
- Item's QA
- Chat
- Item exchange with QR code
- Designated meeting location
- Received feedback and rating

Charity Companies

- Register item needs' details
- Item status tracker
- Government APIs to verify for legitimate companies

Tools Used

Figma
Quick design, build, export prototyping, real-time collaboration

Flutter
Support front-end framework with flexible widgets to build quick UI

Firebase
Backend-as-a-Service solutions, manage dynamic data in real-time
